(b) "EBITDA" is defined as the sum of income (loss) from continuing operations plus interest, taxes, depreciation and amortization. "Adjusted EBITDA" is defined as the sum of EBITDA plus restructuring charges and reorganization items. EBITDA is presented because it is used by us and we believe it is frequently used by securities analysts, investors and other interested parties, in addition to and not in lieu of results prepared in conformity with accounting principles generally accepted in the US ("GAAP"), to compare the performance of companies. We believe investors would be interested in our Adjusted EBITDA because this is how our management analyzes EBITDA from continuing operations. The Company also believes that Adjusted EBITDA, in combination with the Company's financial results calculated in accordance with GAAP, provides investors with additional perspective regarding the impact of certain significant items on EBITDA and facilitates a more direct comparison of its performance with its competitors. EBITDA and Adjusted EBITDA are not measurements of financial performance under GAAP. They should not be considered as an alternative to cash flow from operating activities or as a measure of liquidity or an alternative to net income as indicators of our operating performance or any other measures of performance derived in accordance with GAAP.
